The following serves as Clarification Memo #5 for PACTG P1059 "A Phase I, Open-Label Study to Evaluate the Safety and Tolerability of Recombinant HIV-1 Vaccines in HIV-1 Infected Young Adults with Control of HIV-1 Replication and on Stable Highly Active Antiretroviral Therapy (HAART)", version 1.0, dated January 31, 2005. This Clarification Memo is available from the P1059 protocol specific web page on the Pediatric ACTG Website (http://pactg.s-3.com). The username is: pactg and the password is: cure (all lower case).

This memo is being issued to notify sites of a change in troponin testing. Troponin-I is considered an obsolete test. Troponin-T is considered the most appropriate test to use and should be allowed in place of Troponin-I.

This change applies to Section 4.14 and Appendix I of the protocol, page 2 of 2. Effective immediately, change to read “Troponin I and/or T”

This information will be added to the next version of the protocol. Please contact the protocol team at actg.teamp1059@fstrf.org if you have any questions.

Thank you for your participation in PACTG P1059.
