RE: CLARIFICATION MEMO #2 for PACTG P1061s – Change in Shipping Location for Immunology Specimens

TO: IMPAACT PIs & Study Coordinators at Sites Participating in PACTG P1061s

FROM: PACTG P1061s Protocol Team

The following serves as Clarification Memo #2 for PACTG P1061s "Evaluation of Immunologic Memory Following Pneumococcal, Hepatitis B, and Measles Vaccination in HIV-Infected Children Treated with Highly Active Antiretroviral Therapy (HAART)", Version 1.0 dated 8/2/05. This Clarification Memo can be obtained from the P1061s Protocol Specific Web Page area of the IMPAACT Website (http://pactg.s-3.com). The user name is pactg and the password is cure.

This Clarification Memo changes the shipping location for all immunology specimens, per the June 19, 2006 Protocol Specimen Shipping Alert. All specimens for immunologic studies are to be shipped ambient to the Children’s Hospital of Philadelphia (CHOP) instead of to the Pediatric Immunology Core Laboratory as currently stated in Appendix I-Schedule of Evaluations and Appendix IV- Immunology Collection and Shipping Instructions.

Thank you for your interest in PACTG P1061s. Please contact the protocol team at actg.teamp1061s@fstrf.org if you have any questions.
